Medical Image Analysis Report

Report Date: April 20, 2026 at 17:20

Report ID: MED-20260420225023

Patient Information

Name:	3ee
Age:	33
Gender:	Male
Modality:	MRI

Diagnosis Results

Primary Diagnosis:	No Tumor
Confidence Level:	45.6%
Severity:	Mild

Disease Description

The MRI examination shows normal brain parenchymal signal and structure. No abnormal masses, enhancement, or significant structural abnormality is detected. Ventricular size and sulcal pattern appear within normal limits.

Treatment Options

• No treatment required for brain pathology

• Address presenting symptoms if any (e.g., headache management)

• Routine follow-up as clinically indicated

• Consider alternative diagnoses if symptoms persist

Prevention

• Maintain overall brain health through exercise and diet

• Cognitive stimulation and social engagement

• Adequate sleep and stress management

• Regular health check-ups

• Avoid excessive alcohol and substance use
